	INTERNATIONAL SEARCH REPORT	International application No. PCT/US04/11271				
	Continuation of Box II Reason 2: In these claims, numerous variables {e.g., HET, R¹, R², R³, etc.}, their voluminous involved meanings, their large number of permutations and combinations and the list of compounds in claims 9-16 make it virtually impossible to determine the full scope for which protection is sought. As presented, the claimed subject matter cannot be regarded as being a concise description for which protection is sought and as such, the claims do not comply with the requirements of PCT Article 6. Thus, it is impossible to carry out a meaningful timely search on same. A search will be provided on the first discernable invention which is the subject matter of claims 9-12.
